**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I manage a small business that is highly dependent upon fast Internet to upload/download/share files. Before Sonic came along, our options in technological sophisticated San Francisco were Comcast, at 10 Mbps up/50 Mbps down, or AT&T at 3 Mbps up/6Mbps down. Both cost more than double what I am paying now for Sonic, and I am getting 100+ Mbps up/300+ Mbps down over wifi! I am able to do 2-3x the amount of work I used to be able to accomplish, which makes our small business that much more competitive and more successful.

Our experience with Sonic for business use was so impressive and so positive that all of us in the office now also have Sonic at home. We get more reliable, faster Internet for a fraction of the price and with NONE of the poor customer service hassle I've had with both AT&T and Comcast.

We need MORE providers of broadband Internet service, not fewer. We need competition, not monopolies. And we need local services, bringing jobs and access to all communities.
