**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Sonic is the first Internet provider to give its consumers an excellent combination of 1G up and 1G down for a great price.

I do not understand the very idea of limiting the work of this company, unless the goal is to destroy competition and giving all the benefits to these giants, inept in competing. These huge companies such as Comcast, AT &T - a true oligopoly with the negative connotations intended - would do anything to block the consumers from becoming a part of 21st century.

It is a shame that FCC is becoming a part of this irresponsible game.

Aren't we way behind many countries, for instance, such as Japan, South Korea, which have gigabit connections as their standard connection?

Sincerely,

Paul Tovbin
