**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I have been a Sonic customer for nearly a year now. I have chosen Sonic because they provide great internet service that is competitive and far superior to the local options. In San Francisco, it is increasingly common to work from home part time or even as a full time remote employee and access to quality broadband internet is critical to being able to perform -- not to mention to having a work-life balance or even take care of children when they are sick but also being able to perform job responsibilities.

Access to a variety of internet and phone providers is critical to the social and economic well being of any progressive society. This includes having fair prices and a government that stands up for the people's access to information and technology which is powered by internet and phone services. I beg the FCC to say NO to price hikes that will increase the cost of internet and phone services. I beg the FCC to support a fair broadband competition.

Please listen to those of us who have taken the time to speak out and write a letter. For each of us, you can bet there are 10 more who share the sentiment but are unable to take a few moments to write.

Sincerely,

Sarah McCoy
