

We as a global community and a Nation must not allow utility providers to charge for Knowledge.

We must allow the equal distribution of Internet content. Because if knowledge is power, we can not let the rich dictate to the poor what truth is.

This at it's core concept is the reason we started our country in the first place.

Net Neutrality must become a regular part of the industry at this point. Because we are already suffering the effects of those in power, dictating what is and is not really happening every day.

We as a Nation and a global community. Must not give the power to control knowledge to the rich and powerful. History has shown what lies down this path.

Please for the love of life as we know it.  
Pass Net Neutrality into action.
