**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Living in a small rural community has many advantages socially which have been enhanced by the internet market place. Our internet access is provided by small providers who can provide us excellent service and reliability at a reasonable price. This only exists because the small providers can access the larger networks without cost. Changing that will allow the large communication firms to monopolize the business, stifle innovation and drive up prices. Back to the "mother Bell" model is not a solution. Regulations place in a free market place is to provide equity and access to all. Don't drive out the smaller providers who provide the service to those on the fringe of the larger firms markets.
