**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I chose Sonic, a competitive local provider of internet service, because their customer service, internet speed and overall user experience far exceeded any other offering in San Francisco (ATT, Comcast, etc).

Competition is American as Football, Baseball and Apple pie (many county fairs compete for the best pie) and voting against this is like voting for football games to end in ties or to be fixed so the Niner's always win - and for the record: I am a lifelong Niner fan and even I don't want that.

Competition keep us all on our toes and makes us strive to be better. It also keeps service providers on their toes and makes them strive to gain market share by lowering prices and increasing service quality which in turn benefits the consumer.

I had DSL service for years and I now have Sonic Fiber at my home office. I have been waiting for Sonic to get it installed all over San Francisco so I can use it at my businesses. It is BY FAR a superior service and experience than anything anyone else has to offer. DSL isn't even close.

Please support American competition and make apple pies taste better, football and baseball games exciting, and my internet speed lightning quick and reasonably priced. Voting against that would just be un-American.

Thank you very much.
