**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I Matt Roohian, strongly disagree with what you are trying to force competitors to Comcast, Att and any other giant Communication company out of the market. Then mentioned companies be able to give us bad service at higher prices and just because they can.

Please leave the Law as is and help to make smaller companies to become stronger competitors to giants. As a consumer, we want a better service with competitor prices. Currently, I'm stuck with Comcast with very terrible internet service (18mbt/s) most of the time and I'm paying for (300mbt/s) which is a very high price tag and there is nothing I can do about it.

I had their technicians try to fix the problem since last year and they know there is something wrong with my line but still, I have to pay them the full amount. Comcast knows that there is no other entity out there that can compete with them for their customers. At present, in my area, there are not many companies that can give me a fast internet which I need with my home-based office.

Slower DSL might be available in my area, but it is slow and they are not competitors for giants like Comcast. I'm not just talking about Comcast any communication companies that hold the monopoly. It is extremely critical to have other local internet companies as a competitor to giants.
