**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Where I live in San Francisco neither at&t nor Comcast was offering high speed symmetrical gigabit Internet capable of supporting modern cloud services. I did not want bundled cable TV services since I rely upon over the air broadcasts and on demand services via Internet. Cost for Sonic.net 900/900 mbps was less than my former Comcast 6up/60 down internet.

Using cloud based services for photos and movies would crater our Internet access when uploading occurred. Now on Sonic.net cloud services I need are quite good.

I was too distant from a central office for copper to bring decent DSL services. Sonic fiber saved the day and along with it I got a digital phone on battery backup.

If Sonic is forced out costs are sure to rise significantly.

Last but not least, Sonic respects privacy and does not track my travels on the Internet. Other providers do and they make money selling information about me. This should mean they could provide better services but that was never the case.
