**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I had Comcast for years and have had to always deal with the true speeds being significantly slower than what was advertised. I work from home because my wife is chronically sick and a reliable internet connectivity is critical for me. After dealing with Comcast headaches for a long time, I switched to a locally recommended Sonic.net and they have been fantastic. I get the advertised 12Mbps, their bundled long distance telephone service is wonderful and I am thankful I have this choice.

It would be terrible to only have AT&T or Comcast being available. From long experience, customer service is not something they particularly care about. Looks like AT&T managed to kill Google fiber and now they seem to be going after Sonic.net as well. Please do not allow this!
