**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Competition is a key component to a well working market, and to the success of our citizens and our nation as a whole. My options as far as internet service providers are limited, and I'm aware that it could be much better. This is why I subscribe to DSL with Sonic, even though it is inferior to the cable internet I could choose to subscribe to with Comcast.

We need legislation in place that rules that certain infrastructure, that entails the last mile from a provider to my place of residence, should become public utility infrastructure after a certain period of time. This has been done in the past with telephony networks, which should remain, and it should continue with other communications utilities.

We need competitors like Sonic, Google, and any others, to be able to come in and provide fiber internet services. It's only competition that the market will work.
