Iron County Village gets 4 Feet of Snow

By Associated Press | Posted: Fri 10:56 AM, Nov 14, 2014

GILE, Wis. (AP) -- More than four feet of snow has hit a small Wisconsin village on the Michigan border this week.

National Weather Service Meteorologist William Leatham says it started with a low pressure system that caused snow Monday and Tuesday, which helped bring in lake effect snow the rest of the week. Leatham says 50.1 inches fell in Gile.

He says it's not unusual for the area to get lake effect snow in November, with the warm Lake Superior waters and cold winds.

Three miles away in Hurley, Wisconsin, residents received 38 inches. Leatham says it's not unusual for lake effect snow to have bands of larger accumulation, but it is unusual to get so much in five days.

He says the Gile snow spotter reports about 240 inches of yearly snow.

Ashland, Iron Counties Could Get Half Foot of Snow

By Associated Press | Posted: Mon 10:54 AM, Nov 05, 2007

UNDATED (AP) -- Winter-like weather returns to Wisconsin.

More than six inches of new lake effect snow is possible between Ashland and Hurley overnight.

Gusty winds could whip that snow into drifts.

There's a wind advisory today for all of Wisconsin.

Scattered sprinkles and flurries are possible to the south.

A winter storm watch is in effect through tomorrow in Vilas County.

From the Weather Authority... The National Weather Service has issued an Areal Flood Watch effective until 1:00 AM Thursday for the counties of Adams, Juneau, Langlade, Marathon, Menominee, Portage, Shawano, Waupaca, Waushara and Wood. Snow Arrival Starts Long Season in Wisconsin's Far North

By: Associated Press

The season's first snowfall only drew laughs at a nightspot in the heart of Wisconsin's Lake Superior snow belt.

By Wednesday night a few inches had fallen at Saxon in Iron County, although everyone knew the forecast showed another half a foot or more could be on the way.

Doug Anderson was at the Bear Trap Inn in Saxon, about five miles from the shore of Lake Superior, as the snow fell. He joked that area residents expect to have snow until July, because where he lives, "summer up here is just three weeks of bad sledding."

Ten miles to the east at Hurley, Ron Kern had planned to close his Dairy Queen restaurant for the season Saturday and miss the snow season, but he didn't quite make it.

Weather officials say the snow belt along Lake Superior could get six to nine inches of snow in Ashland and Iron Counties and a little less than that in Bayfield County.

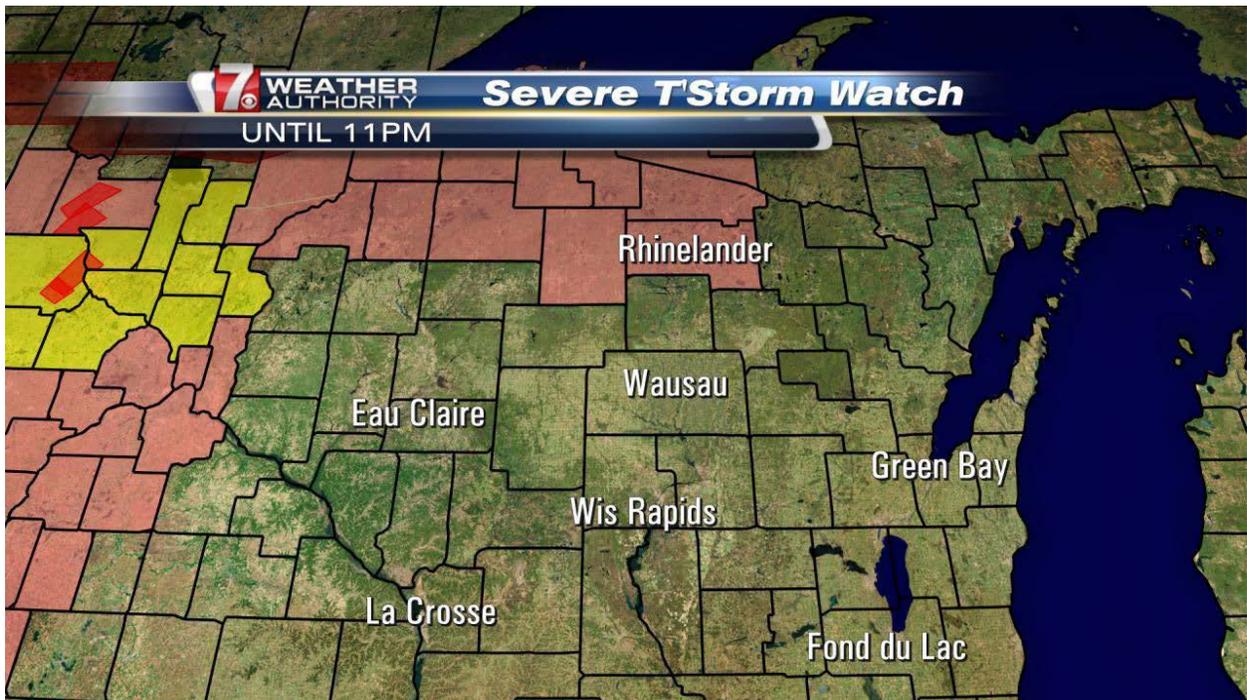

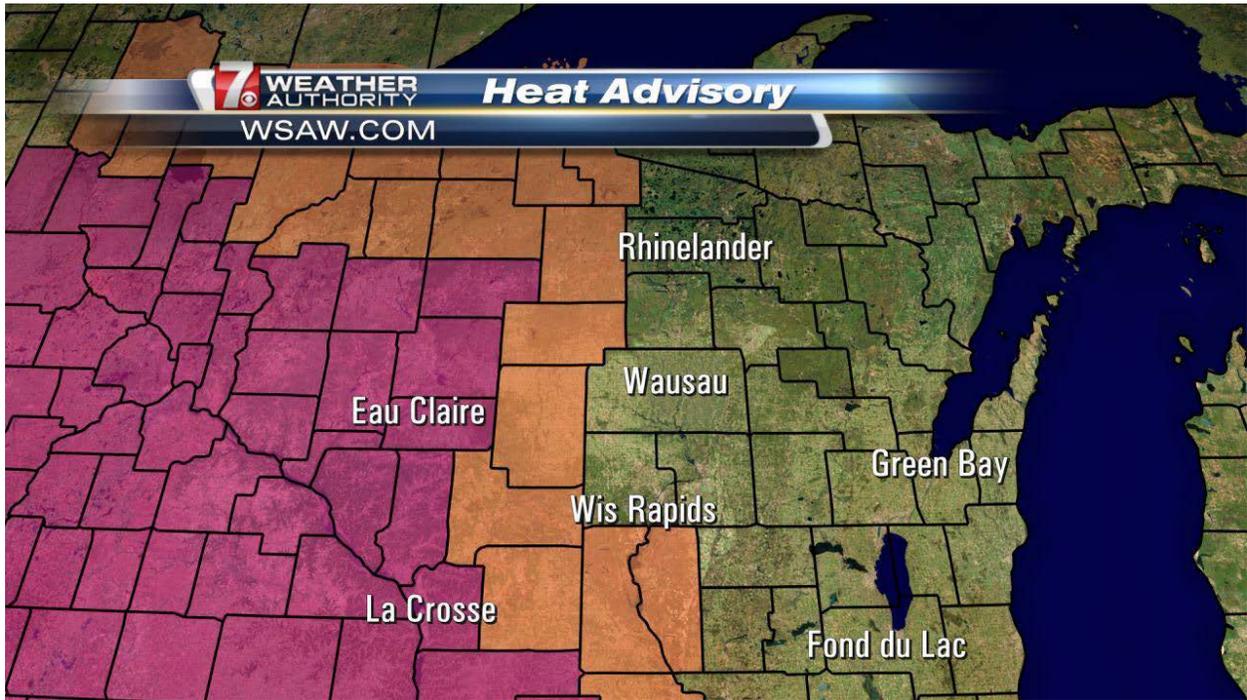

Cold air sweeping in from the northwest sent temperatures below freezing statewide overnight, and the forecast shows cold, windy conditions Thursday.

Attention: R. Stanton Dodge, Executive Vice President and General Counsel

Re: Satellite Market Modification Pre-Filing Coordination Letter

Dear Mr. Dodge:

This letter is to provide you with notice that Gray Television Licensee, LLC ("Gray") intends to file a petition with the FCC seeking modification of the local television market of WSAW-TV, Wausau, Wisconsin (the "Station") to include two counties – Iron County and Ashland County, Wisconsin – that currently are associated with the Duluth, Minnesota – Superior, Wisconsin Designated Market Area. Iron and Ashland Counties are classic "orphan" counties that currently lack access to news, sports, weather, and other local programming produced by Wisconsin TV stations.

In connection with Gray's market modification request and pursuant to the pre-filing procedures established by the FCC in its September 2, 2015 Report and Order, Gray hereby formally requests that DISH (1) determine the feasibility of including Iron County and Ashland County in the Station's local television market; and (2) provide Gray with a certification reflecting the feasibility of this requested change.

Please provide the requested certification within 45 days of the date of this letter, or no later than August 22, 2016. Let me know at your earliest convenience if DISH will be unable to provide a timely response to this request.

Please feel free to contact me directly if you have any questions regarding this matter.

Very truly yours,

Jason E. Rademacher
Counsel to Gray Television Licensee, LLC

Re: Satellite Market Modification Pre-Filing Coordination Letter

Dear Ms. Burakoff:

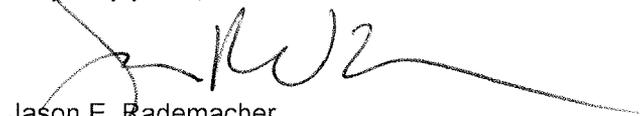

This letter is to provide you with notice that Gray Television Licensee, LLC (“Gray”) intends to file a petition with the FCC seeking modification of the local television market of WSAW-TV, Wausau, Wisconsin (the “Station”) to include two counties – Iron County and Ashland County, Wisconsin – that currently are associated with the Duluth, Minnesota – Superior, Wisconsin Designated Market Area. Iron and Ashland Counties are classic “orphan” counties that currently lack access to news, sports, weather, and other local programming produced by Wisconsin TV stations.

In connection with Gray’s market modification request and pursuant to the pre-filing procedures established by the FCC in its September 2, 2015 *Report and Order*, Gray hereby formally requests that DirecTV (1) determine the feasibility of including Iron County and Ashland County in the Station’s local television market; and (2) provide Gray with a certification reflecting the feasibility of this requested change.

Please provide the requested certification within 45 days of the date of this letter, or no later than August 22, 2016. Let me know at your earliest convenience if DirecTV will be unable to provide a timely response to this request.

Please feel free to contact me directly if you have any questions regarding this matter.

Very truly yours,

Jason E. Rademacher

*Re: STELAR Feasibility Certification, Market Modification Pre-Filing Coordination Letter
for WSAW-TV, MB Docket No. 15-71*

Dear Mr. Grant:

DISH Network L.L.C. (“DISH”) is in receipt of your pre-filing coordination letter (“Letter”),¹ pursuant to the procedures set forth in the Federal Communications Commission’s (“FCC”) rules governing market modifications for satellite carriers under the STELA Reauthorization Act of 2014 (“STELAR”).²

The Letter requests information regarding carriage of WSAW-TV of Wausau, into Iron County and Ashland County, Wisconsin. The attached Feasibility Certification pursuant to 47 C.F.R. § 76.59(e) reflects DISH’s response to the Letter.

Please contact me if you have any questions.

Sincerely,

/s/ Alison Minea

Alison Minea
Director & Senior Counsel, Regulatory
Affairs

Attachment: Feasibility Certification Pursuant to 47 C.F.R. § 76.59(e)

¹ Letter from Jason E. Rademacher, Counsel to Gray Television Licensee, LLC to Alison A. Minea, DISH, July 6, 2016.

² See Amendment to the Commission’s Rules Concerning Market Modification, Implementation of Section 102 of the STELA Reauthorization Act of 2014, *Report and Order*, MB Docket No. 15-71, FCC 15-111, ¶ 47 (Sept. 2, 2015) (“*Market Modification Order*”). See also STELA Reauthorization Act of 2014 (STELAR), § 102, Pub. L. No. 113-200, 128 Stat. 2059, 2060-62 (2014) (codified at 47 U.S.C. § 338(l)).

FEASIBILITY CERTIFICATION PURSUANT TO 47 C.F.R § 76.59(e)

1. This Feasibility Certification is issued by DISH Network L.L.C. (“DISH”) pursuant to the pre-filing coordination procedures contained in the Federal Communications Commission’s (“FCC”) Order¹ governing market modifications for satellite carriers under the STELA Reauthorization Act of 2014 (“STELAR”).²
2. This Feasibility Certification responds to the letter (“Letter”) dated July 6, 2016 from Jason E. Rademacher requesting information regarding carriage of WSAW-TV, Wausau, Wisconsin (the “Station”) into Iron County and Ashland County, Wisconsin (together, the “Counties”).
3. DISH carries WSAW-TV only on spot beams on a satellite located at the 129° W.L. orbital slot. DISH also provides TV service from several other orbital slots.
4. The ability of an individual DISH subscriber in each of the Counties to receive the Station from DISH depends on, among other things, how the subscriber’s individual satellite antenna was originally installed and pointed, and whether that subscriber is predicted to have adequate spot beam coverage from the satellite that carries the Station.
5. In general, a DISH customer’s satellite antenna, when installed, is pointed so that it can receive satellite signals from specific orbital slots. Receiving service from orbital slots not planned for in the original equipment installation at the subscriber’s home typically would require DISH to send a truck and technician to adjust equipment or install different equipment, which would impose a very substantial cost burden on DISH.
6. Although the relevant spot beams that carry the Station do cover the Counties, only a subset of DISH subscribers in the Counties currently have a satellite antenna and related equipment that was installed to receive DISH service from the 129° W.L. orbital slot. DISH subscribers in either of the Counties that do not receive service from the 129° W.L. orbital slot today would be unable to receive the Station, even though the relevant spot beams cover the subscriber’s house. That subset of DISH subscribers in the Counties would require a truck roll and technician to adjust equipment or install different equipment in order to receive service from the 129° W.L. orbital slot.
7. Providing the Station to the Counties would create a complex patchwork of different customer scenarios. Among other things, DISH would need to parse its subscribers in the Counties into different groups depending on whether they are set up to receive service from the 129° W.L. orbital slot. DISH would need to make, among other things, operational and billing changes in an attempt to manage these two different cases. And

¹ Amendment to the Commission’s Rules Concerning Market Modification, Implementation of Section 102 of the STELA Reauthorization Act of 2014, Report and Order, MB Docket No. 15-71, FCC 15-111, ¶ 47 (Sept. 2, 2015) (“*Market Modification Order*”).

² STELA Reauthorization Act of 2014 (STELAR), § 102, Pub. L. No. 113-200, 128 Stat. 2059, 2060-62 (2014) (codified at 47 U.S.C. § 338(1)).

attempting to target the provision of the Station to the subset of DISH subscribers in the Counties who might be able to receive it would cause customer confusion and frustration. For example, one DISH subscriber might be able to receive the Station while her neighbor could not. This, in turn, could lead to a poor customer service experience and a burden on DISH if a subscriber requested to have a technician sent to adjust and replace equipment at DISH's expense in order to receive service from a different orbital location.

8. As a result, DISH has determined that it would be "technically infeasible" and "economically infeasible" pursuant to 47 C.F.R. § 76.59(e) for DISH to manipulate its systems to identify and customize the provision of the Station to the subset of DISH subscribers in the Counties who might be able to receive it, and where applicable to send a truck and technician to DISH subscribers in the Counties who do not receive service from the 129° W.L. orbital slot today.
9. DISH reserves the right to amend this Feasibility Certification at any time due to, among other things, a satellite equipment failure or a different satellite or satellites being brought into service for the area that includes the Counties which has different coverage capabilities than the satellites currently being used.

The foregoing has been prepared using facts of which I have personal knowledge or upon information provided to me. I certify under penalty of perjury that the foregoing is true and correct to the best of my current knowledge, information, and belief.

Dear Mr. Rademacher:

Please find attached the results of your request for a preliminary evaluation of a potential market modification for station WSAW in Iron and Ashland Counties, WI.

DIRECTV's engineering staff was given the areas to evaluate for our Wausau-Rhineland, WI spot beam, and have found that:

- DIRECTV's spot beam covers **all** current zip codes in Iron County
- DIRECTV's spot beam does not cover **7** zip codes in Ashland County

DIRECTV will forward the results of this preliminary evaluation to the FCC for their records.

Thank you for your letter and your interest in DIRECTV programming.

Sincerely,

DIRECTV

Form of Certification Regarding Spot Beam Coverage

1. My name is Phil Goswitz. I am SVP of Engineering at DIRECTV. As such, I am responsible for determining service areas for television stations carried on DIRECTV's spot beams.
2. DIRECTV has reviewed the request to add the communities listed below to the local television market for the station indicated.

Station	State	County
WSAW	WI	ASHLAND
WSAW	WI	IRON

3. DIRECTV has analyzed, with respect to each zip code associated with this request, the expected performance against specific performance criteria. The following factors have been included in this analysis:
- The measured performance of the spot beam covering this Television Station's local market.
 - Estimated atmospheric effects for reception of the signal.
 - Estimated levels of interference.
 - The amount of capacity currently used, and reasonably expected to be used, on the spot beam.
 - The target availability figure used for all television stations offered on the spot beam.
4. From this analysis, DIRECTV has derived the following metrics, which it has used to evaluate the potential to provide service in the zip code(s) in question:
- Signal availability.
 - Clear sky signal margin.
 - Total carrier-to- interference ratio.
5. DIRECTV has conducted this analysis in substantially the same manner and using substantially the same parameters used to determine the geographic area in which it currently offers stations carried on the spot beam.
6. Based on this analysis, DIRECTV:
- Can provide service to all the zip codes associated with this request.
 - Cannot provide service to any of the zip codes associated with this request because reception of the signal does not meet the minimum performance thresholds for DIRECTV's service.
 - Cannot provide service to some of the zip codes associated with this request because reception of the signal does not meet the minimum performance thresholds for DIRECTV's service. The list of unserved zip codes is attached.

I declare under penalty of perjury that the foregoing is true and correct.
