**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I support Broadband fair competition - and urge you to do the same. We are currently seeing the issue when Google, Facebook, and Twitter control all of one revenue stream - deception, unsavory sales of personal information, and manipulation of US citizens. The last mile of connection is so important to all of us, and the big players have not done this because they want to hold the FCC over a barrel to get an unfair advantage. Do not bend to their unsavory practices - and stand up for American rights. I have traveled to many foreign countries and see how an open broadband system brings people together and more people and competition and customer to the marketplace. A closed system will set the US infrastructure BACK in time because it decreases and controls competition down the road - rather than move us into the modern age.

Stand up for American rights!

Matt Bjork
