**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I love our local provider Ideatek. They offer more at far better rates! The customer service is better than any I ever had with At&t or Cox. We need to keep competition alive with this service because otherwise the prices will only go up with the major players. Right now in the town I live in (Hutchinson, KS) there are only Cox and At&t for my internet providers and both offer pretty much the same pricing in comparison. Ideatek however if they did exists in this town offers far more bandwidth at far lower pricing. Cox gigablast is \$150 for 1gb download and upload speeds. Ideatek is \$70 for 1gb download and upload. I can't get a lower price at all in this town without there being other competitors. At&t and Cox have been charging more than what it costs for Ideatek in the surrounding towns and in those towns there are a lot of people that have switched over to Ideatek because they offer such a competitive service. This is what is needed to promote things to get better and cause consumers to get more for less and not the other way around. Please think about what it means to be advancing competition vs giving the ok to give 2 companies so much control in an area that pricing is literally giving less for higher costs.
