

**Proposed Recommendation from CSRIC V Working Group Draft Report on WEA Geo-targeting and Many to One**

**Recommendation 16:** As the majority of the issues discussed in this report and debated throughout this process were initially raised in the Commission's Notice of Proposed Rulemaking, we implore the Bureau and the Commissioners to include these recommendations as part of the upcoming order. By delaying the incorporation of these extremely important lifesaving WEA upgrades until another Commission proceeding, public safety, alert originators and the communities they serve will be denied the benefits of a true 21st century alerting tool.
