

I am requesting that the FCC postpone Commission action on the FCC draft order "Streamlining Deployment of Next Generation Wireless Infrastructure", which was just released on Sept. 5 and will be voted on Sept. 26, at least until January 2019. This extremely short time frame eliminates public and local governments' ability to read, evaluate, react, and comment on the proposed rules. Also most of the public and their elected officials don't know about this order yet. Since this draft order is not posted on the FCC's home page, despite its deep impact on every community and every resident in the U.S., I am requesting that it be posted immediately on the FCC home page. The public comment period on these rules should be open for a minimum of 90 days before a vote. If these rules are implemented, the FCC regulates the public and state and local governments, instead of regulating the telecom and wireless carriers per its mandate.
