**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am a private citizen who supports broadband competition. Competition will keep prices low for consumers, which is a foundation for the universal use and free exchange of ideas in the internet, and incentivize providers to improve the quality, efficiency, and reliability of the devices they provide in order to stay competitive and profitable. It is reprehensible that the FCC would even consider a change or rollback of regulations that so clearly and severely hurt consumers, the people that the industry already overcharges, exploits, and compromises in a search for uninterrupted profit. Do the right thing - preserve ISP competition because it is the right thing to do for consumers, the internet, and ISPs themselves.
