

Reply to Michael LaBond:

Mr. LaBond seems to have a very poor understanding of FCC law and procedure and is trying to blame the Commission for his own misunderstanding.

He seems to believe that the Commission should decide my case based upon transmissions made during the WARFA net, of which he disapproves. However, no such factual matters are before the Commission at this time because I have never had a hearing. The only issue now presented to the Commission for decision is whether ALJ Sippel violated the Administrative Procedures Act by trying to force me to travel to Washington, D.C. for a license non-renewal hearing in a non-remunerative radio service. Mr. LaBond's complaints therefore represent a highly-improper attempt to make an "end run" around due process by presenting ex parte factual matters to the Commission in order to influence its decision on a pure matter of law, without affording me any opportunity to challenge his statements at a hearing.

If Mr. LaBond wants to bring these new factual matters to the Commission's attention, he needs to file a new complaint with the Enforcement Bureau and take it through the administrative process first. However, Mr. LaBond refuses to do that because he doesn't want me to have my day in court.

Mr. LaBond is simply in no position to object to any of the statements in the transmission because they were all made by WARFA personnel, and in WARFA's usual hypocritical fashion he is just trying to disguise that fact.

The disgusting statements repeatedly suggesting that I am giving him *fellatio* over the air were made by WARFA net control Willard Young, KJ6JKA, who makes unidentified, obscene transmissions all over the 75-meter band while disguising his voice and failing to identify his station. Then he proceeds to conduct the WARFA net as its net control while posing and posturing as a good operator.

All of the reprehensible antisemitic statements were made by WARFA net control station WA7BZI and WARFA "Super Station" KW6BUZ. Indeed, Mr. LaBond himself can be heard in the transmission condoning and ratifying the antisemitic statements made by KW6BUZ.

Moody Law, WQ6I, the Secretary and executive officer of WARFA, clearly and repeatedly refuses to share the frequency as required by Sec. 97.101(b) of Part 97, and claims to have the right to deny its use to anyone he doesn't happen to like. When asked why he won't share the frequency, he claims he is too good to associate with those he doesn't like; and that the people he doesn't like are "racists" and are trying to "kill" him, which are purely false and concocted claims intended only to avoid discussion of his and WARFA's Part 97 violations.
