Re: Ex Parte Presentation
GN Docket No. 17-183, *Expanding Flexible Use in Mid-Band Spectrum Between 3.7 and 24 GHz*
ET Docket No. 18-295, *Unlicensed Use of the 6 GHz Band*

Dear Ms. Dortch:

On September 23, 2019, Ultra Wide Band Alliance (“UWB Alliance”) Executive Director Tim Harrington, Kelli Emerick and Marc-Anthony Signorino (121 Strategies, consultant to UWB Alliance), and Erik Steltz (iRobot), met with the following staff from various FCC Commissioners’ offices to discuss the above-referenced proceeding:

Aaron Goldberger, Wireless and International Advisor – Office of Chairman Ajit Pai
Joseph Calascione, Legal Advisor – Office of Commissioner Brendan Carr
William Davenport, Chief of Staff – Office of Commissioner Geoffrey Starks
Umair Javed, Legal Advisor, Wireless and International – Office of Commissioner Jessica Rosenworcel

During the meeting, UWB Alliance discussed a proposal for spectrum coexistence that would allow for more flexible use in the 6 GHz band, while protecting incumbent licensees’ users and existing unlicensed UWB users. A visual presentation was also provided during the meeting, which has been attached to this letter.

UWB Alliance representatives explained that current proposed unlicensed broadband deployment, at the requested power levels, bandwidth, and OOB would effectively render many UWB products, services and applications useless. UWB Alliance asked the FCC to consider mitigation solutions that will continue to allow for unlicensed UWB technologies to successfully coexist with incumbent users in the 6 GHz band and provide valuable functionality.

Respectfully Submitted,

Timothy Harrington
Executive Director
UWB Alliance
