September 26, 2019

Ms. Marlene H. Dortch, Secretary  
Federal Communications Commission  
445 Twelfth Street, SW  
Washington, DC 20554

**Re: Ex Parte Presentation**  
**GN Docket No. 17-183, *Expanding Flexible Use in Mid-Band Spectrum Between 3.7 and 24 GHz***  
**ET Docket No. 18-295, *Unlicensed Use of the 6 GHz Band***

Dear Ms. Dortch:

On September 26, 2019, representatives from the Ultra Wide Band Alliance ("UWB Alliance") Tim Harrington and Ben Rolfe, as well as Marc-Anthony Signorino (121 Strategies, consultant to UWB Alliance) met with staff from the FCC's Wireless Office of Engineering and Technology (OET) to discuss the above-referenced proceeding. Identified representatives from OET included Ron Repasi, Aspasia Paroutsas, Paul Murray, Jamison Prime, Michael Ha, Karen Rackley, Bahman Badipour, and Nicholas Oros. During the meeting, UWB Alliance discussed a proposal for spectrum coexistence that would allow for more flexible use in the 6 GHz band, while protecting incumbent licenses users and existing unlicensed UWB users. A visual presentation was also provided during the meeting, which has been attached to this letter.

UWB Alliance representatives explained that current proposed unlicensed broadband deployment, at the requested power levels, bandwidth, and OOB E would effectively render many UWB products, services and applications useless. UWB Alliance asked the FCC to consider mitigation solutions that will continue to allow for unlicensed UWB technologies to successfully coexist with incumbent users in the 6 GHz band and provide valuable functionality.

Respectfully Submitted,

Timothy Harrington  
Executive Director  
UWB Alliance
