RECEIVED

Dear Mr Sikes

i a longtime video buff i subscribed for a video magazine when it first started
i own two tv,s two vcr,s a scanner and other radios & etc

Federal Communications Commission
Office of the Secretary

i want to get my two cents in on HD TV i think it should go to an american company if possible with strings attached
it should be made in USA only no other country licensed to mfg.

i saw a tv program on feb 22 if you didnt see i think you should

it was frontline coming from japan for a copy 1800 328 PBSI or PBS Braddock pl Alexandria VA 22314

ORIGINAL
FILE

it was about how japan took advantage of our tv industry

if you cant get a copy send me a vhs blank and i will dub you one and return it by return mail

EX PARTE OR LATE FILED

... At Japan's mercy

... It makes me sick to see what is going on in our country because little or no attention is being paid to our national well-being. President Bush ... is not inclined to be very helpful when it comes to Japan. I believe he is blind, as was Ronald Reagan in this regard....

I cannot believe we as a people are so trusting and stupid that we cannot see what Japan is doing to us. We simply cannot exist, stay solvent, or maybe even free, if what they are doing is not stopped. I don't believe what I have seen over many years and have warned against whenever and wherever I could. We are not the power we once were and maybe will not ever be again because of our trust, our failure to be aware and our wrong beliefs. Japan is fully aware of our condition and is playing us for all it's worth at an opportune time for them. They have been wanting world domination for centuries....

Our government has been criminally stupid in its trust of Japan. And our people are stupid when they hurt us by buying Japanese products. We are at their mercy. They know it and they intend to keep us that way.

We can stop it, I hope.... Sorry, but this is the way I believe and all I see, hear and read further reinforces my belief. As time goes on, I will be proven right.

APR - 3 1992

CAMERA A federal court jury yesterday ordered the camera makers Co. to pay \$96.35 million to Honeywell Inc. for infringing on Honeywell patents in manufacturing autofocus cameras. Industry analysts said the verdict will push other camera companies to settle with Minneapolis-based Honeywell, which said it will file similar patent suits against at least 15 other firms.

BIAS SUIT. A federal judge in Chicago has ordered the Quasar Co., a division of Japanese-owned Matsushita Electric Corp. of America, to pay nearly \$2.5 million plus court costs to three former employees who sued claiming discrimination on the basis of age and national origin. The plaintiffs were fired in 1986 as part of a reorganization that reduced the number of managers from 89 to 23. None of the nine Japanese managers was fired.
