

Speaking as a employee at Braintree Community Access and Media, I can say that by dropping the funding for public access television means that we have to find our own funding, if we're fortunate enough to find it that is. Many Public Access Channels will have to 'close up shop' so to speak. And many people will lose their jobs. Along with the fact that if Public Access was gone that means that so many important events will no longer be covered. Such as High School Graduations, Town Meetings and School Committee Meetings, Varsity Sports from the towns High School, and so much more. We have to consider the fact that this is affecting the Public Access employees, in front of and behind the camera, and it affects the people of the town, parents will no longer have important moments recorded of their children and citizen will no longer have easy access to town/school meetings. I could go on but I hope you get the picture.
