While the corporate entities in the table do not have defined operating regions, T-Mobile used, as a proxy, data from its finance records to determine where each company has allocated fixed assets for tax purposes.

The supplement consists of a single DVD containing the load files, production index, production materials, and other referenced items associated with the document production changes, containing items tagged as “Highly Confidential,” “Confidential,” and “Public,” per the Protective Order.<sup>2</sup> Pursuant to the procedures set forth in the Protective Order, a copy of the
