

Federal Communications Commission
Washington, DC 20554

In the matter of

Amendment of the Amateur Service
Rules Concerning the 222-225 MHz
and 1240-1300 MHz Frequency Bands

Comments of William Clemow KE7CX

These comments are offered in response to the Commission's Notice of Proposed Rule Making in the above captioned matter. I support the proposal to set aside 222-222.150 MHz for non-repeater use.

I believe that each VHF-UHF band deserves to have a reasonable portion set aside for non repeater small signal SSB and CW activity. These sections of the bands are uniquely able to allow amateurs to pursue technical achievements in both propagation and equipment. No two bands are alike in their capabilities and requirements. Please preserve the ability for those so inclined to have SSB and CW only segments available to them. Thanks.
