

I am opposed to the FCC taking away Net Neutrality. In taking away Net Neutrality the FCC is basically saying Small Businesses don't matter as much as Big Businesses and should have to pay more to try to reach their consumers. Also, Middle Class and Poor people should not have to pay more to use the internet. This is discrimination on a binary level and should not be allowed. If this is passed Americans will sue. We need to let Net Neutrality stand to protect everyone.

Thank you!
