I am writing to urge the FCC to DISMISS NPRM 16-239.

I have reviewed many of the public comments, and it is clear there is no agreement that this would be an effective regulatory mechanism. The baud rate restriction does not efficiently address the petitioner's or FCC's objectives. A spectrum bandwidth limitation may be effective, but requires a new proposal. At this time I request the FCC to dismiss the current NPRM 16-239.
