

I strongly support the continuance of true net neutrality for the American Internet. Currently, it stands as a platform for free speech, limitless potential, and a fair way for every voice to be heard. If ISPs gain the legal ability to choose which websites are able to get to the masses easier, which messages get to be broadcast to the largest groups, and which websites we can access, it will effectively be the end of the internet as a tool for free speech. This is literally anti-american. Please consider the future of America. Please consider your children's future. Please consider your political legacy. Do you want to be known as the group that stood up for the average citizen and allowed free speech to reign? Or do you want to be known as the group that legally allowed corporate censorship and information control? Please do the right thing.
