

Hi I'm writing to you to let you know that I deeply support Net Neutrality. We've already seen the damage that repealing it can do, for example when in 2012 AT&T tried to block access to FaceTime unless customers paid more money which wouldn't be allowed under current Net Neutrality rules. If Net Neutrality gets repealed I think they'll do a lot worse than that and prices will go up. Please support Net Neutrality.
