

Chairman Pai,

I strongly opposed the repeal of Net Neutrality as I believe the internet should be free and open and not limited by the service provider or by financial extortion. Please know your personal view is in the minority compared to the American people, of which you are a servant to. By taking a public office, you must hold back personal feelings when the will of the people you serve have a different view or stance. If you cannot follow your constituents instructions, you should resign and allow others who want to serve to take your place. Please consider this in your decision on Net Neutrality. Thank you.

Brendan Rickert
