

I am one of the people that helped fight for Net Neutrality. If Net Neutrality is changed in any way our work will be disregarded in favor of ISPs and corporations that put profit over the needs of citizens.

Some providers have already said that they will still innovate and continue to provide better service while some, i.e. Verizon, Comcast and others, would love no boundaries and fast and slow lanes for our connections. This isn't right.

Please leave Net Neutrality in affect and help people, especially those on fixed budgets, to stay connected.
