

# SAVE INTERNET FREEDOM

Hi, I'm writing to you the FCC because I want the Government to NOT end net neutrality. This country was based off freedom. Is it not wrong to take away the freedom that people have come to this country to attain? To take away net neutrality is to put power into those who have money such as these internet providers. It's unjust that they can take away freedoms of what we can and can't look at on the internet. Imagine a child working on a school project and learning that he must pay additional fees to complete said project. Also, imagine a single mother trying to look up information where she may be able to receive help with upcoming bills but only learning she has to pay additional fees. I'm proud that I live in an America where we don't have censorship laws which prohibit us, the people to see what's happening around the world and in our own country. With the end of Internet Neutrality I feel that our country is taking a step backward not forward. As I said before our country was based off the principles of freedom, people immigrate and want to start their true lives here because of the freedoms that this country is guarantees. So I plea as a proud American citizen that we don't end Internet Neutrality for we will be destroying the symbol that is the United States to the world.
