Save Net Neutrality,

FCC Filing 17-108

Dear FCC,

I urge you to please end the attack on net neutrality. Telecoms attempts to monetize the internet, a global tool, is UN-American. A monetized internet will only widen the gap between the wealthy and the poor, imagine a child of a poor working-class family struggling just to put food on the table trying to complete research for a school project but loses all internet rights due to an end of a free internet and can't afford to pay for his research.

Please, end these relentless attacks on our freedom. An end to a free internet will be the end of my faith in America.

Sincerely,

Drew Scott
