

I am writing to voice my support of Net Neutrality. By privatizing access to the internet, the access of information will be restricted by those in power, which is the exact opposite of what should be in place.

Might as well repeal the Freedom of Information Act while you guys are at it; put the finishing touches on the absolute dictatorship run by Trump media.

Even if the repeal goes through, Net Neutrality would be reinstated effective January 21, 2021. So why waste everyone's time?
