I'm am against the repeal of net neutrality. I believe that the internet should be free and open to all Americans. The traffic should be the same for all websites. If ISPs start charging for certain features, many would drop social media accounts and the end result would be loss of ad revenue and ISPs would also loose money as well. Scription services like Hulu and Netflix would loose money as well, and people would cancel instead of paying a fee to website they already pay for. This would not promote competition but instead loose money as well. People are not willing to pay for websites that should be free to access. Please do not pass this. There is

already healthy competition with net neutrality. Please do not get rid of it.
