

Please do not end net neutrality. I have never spoken to anyone who agrees that this would be a good course of action, nor can I see it benefitting anyone but the greedy individuals higher up on the corporate food chain. The entire proposal is extremely suspect and seems likely to harm or at least hinder anyone exercising their right to free speech in our country and looks to provide an extremely biased environment for business. The FCC needs to back off of this agenda permanently and rid itself of the corporate interests attempting to capitalize on what is essentially a need in the modern era. Please heed the outcry of the public and use your power for the good of the people; DO NOT END NET NEUTRALITY.
