

Dear Government,

Calling this “Restore Internet Freedom” is both a fallacy and a farce. Repealing Net Neutrality is ridiculous. Our government seems to be more and more every day to look out for large corporations and not for working class Americans.

DO NOT repeal Net Neutrality. DO NOT pass “Restoring Internet Freedom Act” which is a gross mis-representation of words. Stop labeling things in a way to trick Americans, stop burying awful things within laws hoping no one notices. These practices are disgusting.

I’ve voted R and I’ve voted D. I’ve seen both sides do things bad for the American people but good for large corporations. We are tired of this stuff, stop.
