

Dear Chairman and Executive Committee,

My name is Graeme Lewis, and I am a citizen of the United States living in Wisconsin. I urge you to vote against proposal 17-108 because the Net Neutrality repeal will hurt American small businesses. It will stifle internet access for the impoverished and rural citizens. Instead of allowing a free market, as the Internet does now, it will allow an un-American oligarchy of corporations to control it. Repealing Net Neutrality will hurt the United States and make it less competitive in the international marketplace.

Yours,

Graeme Lewis
