To Whom it May Concern,

I am expressing concerns over the repeal of net neutrality as I strongly feel this is an infringement upon the flow and freedom of information. This also encourages the growth of net monopoly by larger corporations, leading to expelling of fair competition for smaller corporations and businesses. I feel this will also restrict my choice of what information I choose to stream or receive on the internet, which will affect my first amendment rights on what will be shared on various social media platforms.

Thank You,

Kristian VanWormer
