To: Federal Communications Commission
RE: Proceeding to repeal network neutrality rule
From: Mary Scheib RN MSN FNP

I support the continuation to the network neutrality rule.

As a small business owner attempting to establish an ongoing client base, I count on fast speeds and equal access so clients are better able to find me online. Searches that would give more weight to larger businesses in my field would greatly impact the sustainability of my business.

When I buy broadband internet access I expect and need access to all the internet has to offer, email, cloud storage at FAST speeds. For example, I use and need internet services outside of my Internet Service Provider—such as google voice, email address and cloud sharing of documents.

There are not that many choices of ISPs and I expect the good use of government to protect me, the small consumer, with oversight of and protection for the equal access to communications networks
