

Dear FCC,

I am writing to you today to urge you to NOT repeal net neutrality.

A free and open internet is the single greatest technology of our time, and it encourages creation of independent content and innovation services, supports entrepreneurship, stimulates ISP competition and helps prevent unfair pricing practices. Without an open internet, big corporations would have tight control over how we access websites and services and even who can get access.

Control of the internet should not be at the mercy of corporations. The current regulations need to remain in place so the ALL businesses and people have an equal presence on the internet and innovation can continue to flourish.

Regards,
