

The regulations that prevent internet service providers from blocking access to certain sites, throttling internet speeds, and otherwise control what websites and online services are available to customers need to stay in place. Net neutrality allows ALL users to have equal access to everything available on the Internet and prevents the internet becoming a pay per view such as cable tv has become. Without net neutrality small businesses, low-income individuals, and much of rural America would lose access to affordable, reasonably-fast internet service. I am quite aware that four major ISPs (Comcast, Time Warner Cable, Verizon & AT & T) have been lobbying against the 2014 net neutrality regulations. Our government is in place to protect the interests of the many in the face of the few who want to make a fast buck!
