Re: Notice of Ex Parte Communication: **GN Docket No. 14-177**, Use of Spectrum
Bands Above 24 GHz For Mobile Radio Services

Dear Ms. Dortch:

On November 27, 2018, Neeti Tandon of AT&T Services. and the undersigned, met with Michael Ha, Barbara Pavon, and Bahman Badipour, of the Office of Engineering and Technology (OET) and John Schauble, Blaise Sinto, Nancy Zaczek, and Steve Buenzow, of the Wireless Technology Bureau (WTB).

During the meeting, AT&T noted that there were many common elements in the various proposals from the record regarding sharing in the lower 37 GHz band and in order to advance the development of sharing rules, it had developed a proposal that seeks to meet the needs of the broad range of spectrum interests in this proceeding. The discussion closely followed the topics in the attached letter.

Pursuant to Section 1.1206(b)(2) of the Commission's rules, an electronic copy of this letter is being filed in the above-referenced. Please contact me should you have any questions.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Stacey Black".

Stacey Black
