To Whom It Might Concern:

Efforts are under way to limit the general public's access to the internet by curtailing what is known as "net neutrality". These efforts threaten to undermine freedom of all to use the internet without paying extra for some access. If these efforts succeed, persons unable to pay those additional fees will be stymied in their quest for knowledge, entertainment, employment, and communication.

Please do not allow this appalling restriction which will principally impact persons in lower economic sections of America. To do so thwarts advancement and limits the potential of our fellow citizens.

Sincerely,

CORLEY LAW FIRM

/s/ M. Corinne Corley
