

The internet was discovered using tax payer money. We pay \$79 a month just for cable bill. I have less and less money to pay my bills and get food on the table. If you don't protect internet freedom of speed and equal access then the cable companies will raise the price of internet again and I will no longer be able to afford it. No more internet or cable just so I can keep a roof over my head and food in my kid's bellies. Say no to Restoring Internet Freedom which is really only serving the corporations and not average Americans like me and my family. Thank you for securing Net Neutrality

We ALL deserve to have access to information equally-no matter how much you can pay. Just like a library, the internet serves as a research platform and a life line to the world!! INTERNET NEUTRALITY shouldn't even be a question!
