

Dear Fcc,

You are money hungry monsters. Net neutrality is the thing keeping the internet free and safe. I won't explain what you're doing because you know exactly what that is. This has been one of the scummiest things i have ever heard of, and i can't believe you legitimately think you are getting away with this. People like you disgust me. The moment you get rid of net neutrality, I am not going to use internet again. You are the worst of the worst.

Mike Wazowski
