

To whom it may concern,

I believe that the internet has become a necessity of the average citizen in the united states. It should not be governed by any ISP address, but rather should be free. I am in support of Net Neutrality and in direct opposition to any changes that allow internet service providers to gain any more power, even if hypothetical, on the distribution of information on the internet. I am a real person with real concerns that our government is being controlled by people who have no concern for the citizen but only for businesses. Please give the power to the people and support net neutrality.

Pastor Paul Kolander
