

I support Net Neutrality and the Title 2 oversight of ISPs. If lanes are made faster, they should be faster for everyone equally.

The infrastructure of the internet is a public resource, a public right of way, funded through public expenditures, and should now not be given completely over to a few ISPs.

The ONLY reason not to have Net Neutrality is solely to have ISPs make money for nothing but giving certain people less for no other reason but greed.

Do not take Net Neutrality away, STRENGTHEN IT!

P.S. I have heard the claim that many of the comments here are "Fraudulent" simply because they are copied and pasted with the same response. The fact is there are only so many ways to say; "I support net neutrality as it is!" or "I support Title 2 oversight of ISPs and I support net neutrality." Or any other wording saying the same thing. There is no reason to take even the small amount of time I did to state the view that a free, open, equal, internet should remain. They are not FRAUD they are direct and to the point of keeping net neutrality.
