

I submit a motion to postpone the vote on Proceeding 17-108 in order to have public hearings, wherein testimonials and public comment can be considered by all FCC board members in an official and televised way. The Procedure should not pass without public hearing. In the case where a motion to postpone a public hearing fails or is ignored, I've previously submitted comments to 17-108 and below I've included text that I would like to be considered by the chairpersons.

The FCC's website states that the agency capitalizes on its competencies to strive for the following:

- Promoting competition, innovation and investment in broadband services and facilities
- Supporting the nation's economy by ensuring an appropriate competitive framework for the unfolding of the communications revolution
- Encouraging the highest and best use of spectrum domestically and internationally
- Revising media regulations so that new technologies flourish alongside diversity and localism
- Providing leadership in strengthening the defense of the nation's communications infrastructure

If consumer and small-business, and not large corporate, outcomes are prioritized in the FCC's work then there is no reasonable justification for changing the internet's current net neutrality rules. There is no large consumer group vying for the end of net neutrality. There are, however, millions of Americans demanding the protection of our neutral internet. The destruction of net neutrality represents a critical failure in all of the above bullet-points listed as the FCC's core mission statement.

Please be accountable to the vast majority. Please do not change the internet's title II classification.

Protect Net Neutrality.

Thank you for reading.
