

Dear Chairman Pai:

I write to support Net Neutrality. Abolishing this policy is harmful to small businesses, non-profits, and individuals. Corporations do not need another advantage over the individual and smaller businesses and organizations by being able to pay for bigger pipelines. Corporate profits are at record breaking levels. They do not need to be enriched at the expense of smaller businesses and nonprofits.

Furthermore, the repeal of Net Neutrality will further erode our democracy. Corporations already have influence beyond what is good for a healthy democracy. Please do what is best for the American people and not the corporations and their shareholders.

Sincerely,

TyAnn Lindell
