

I am very much against the FCC's plan to end net neutrality. I live in a rural and under serviced area already. I do not want to be forced by more companies to pay for faster service or pay more for access. I already pay way too much compared to citizens in other countries!

This will only allow big business to prosper, and pass along the higher expense. Private citizens, taxpayers, consumers and small business will be hurt by ending net neutrality.

Please stop Chairman Pai. Please support Title II. Please support the people and taxpayers of America!
