

I am a private citizen and I support Title 2 oversight of ISPs and oppose the repeal of net neutrality rules. Net Neutrality is an essential right to citizens living in a democracy. It ensures equal access to information concerning education, health, jobs and careers, environmental issues, political conversations, civil rights documents, and myriad other sources. Access to information on the internet should not depend on socioeconomic status and it should not be control by private corporations whose only interest is the generation of profits for their shareholders. I therefore restate my support of Title 2 oversight of ISPs and oppose the repeal of net neutrality rules.
